

## Reclaimed Wood Booth Assembly

Arrives in 5 boxes

You will need a powered screwdriver and we recommend using a square to be sure angles are exact.

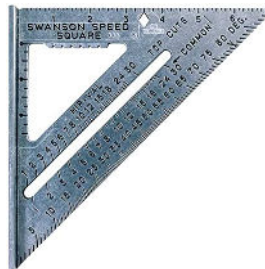

1a) Lay back on floor and attach (3) seat supports as shown.

**1b) Secure with screws in pre-drilled holes as seen here... 6 smaller screws are used for the pieces with an angle cut out of them for the back rest.**

**2a) Attached front panel by sliding in place as shown.**

**2b) Secure with screws in pre-drilled holes. Be sure to use a square to make sure all angles are at 90 degrees.**

**2c) Will look like this when you set it upright.**

**3a) Insert Backrest and end caps with screws.**

**3b) Inset top cap with screws.**

#### 4) Platform

4a) Line up with an overhang and attach booth top to platform with L-brackets as shown.

4b) Attached.

**5a) Seat is removable for storage underneath. Sets in place without movement once installed.**

**5b) Attached Seat**
